Professional Summary

Coordinator with 3+ years taking a hosting order from billing to a live service. Credits, usage, and cost sit on one account, and billing and usage reports serve 5,000+ users. A paid order turns the service on, and the GST invoice is filed from that same order after the invoice fields are checked.

Skills

Coordination: order setup, provisioning, release timelines, handoff from payment to a live service
Cost and billing: credit billing, monthly plans, sales and cost, profit view, payment activation, GST invoicing
Reporting: billing, usage, and server dashboards, D3.js charts, account status without a second tool
Stakeholders: reseller and admin accounts, customer white-label accounts, finance invoice checks
Records: MySQL billing and usage records, validation before filing, logging on external calls
Delivery: GitHub Actions, Git, Linux, release from a repo or ZIP to a live URL

Work Experience

Full Stack Developer, Hostzop Cloud Technologies Pvt. Ltd. Aug 2023 - Present

- Coordinated billing, sign-in, provisioning, and the user record so a customer order is one account instead of separate requests.
- Tracked credits, monthly plans, and usage together. Admin and reseller views show profit, usage, and clients, with sales and cost on one account.
- Prepared billing, usage, and server reports for 5,000+ users. D3.js charts load in the page without a full reload.
- Kept payment and invoicing on one order. Stripe or Razorpay turns the service on, and MasterGST files the GST invoice only after GSTIN and invoice fields are checked.
- Removed 9+ hours of invoice retyping each week on that flow, and filing errors on it went to zero.
- Moved VM setup off a manual request. The purchase starts provisioning, which cut setup from 40 minutes to 5 minutes.
- Kept releases on a schedule with GitHub Actions. Release time dropped 5x and deployment issues dropped 90%.
- Set up white-label accounts so a reseller sells under their own domain and brand. Those portals are used by 1,000+ users.

Full Stack Developer Intern, Aspire Systems Apr 2023 - Jul 2023

- Engineered a real-time face recognition attendance system using Python, OpenCV, cvzone, and NumPy.
- Serialized a facial-matching model with Pickle and sent recognized attendance records to Firebase.

Projects

Billing and Usage Reports
PHP, JavaScript, AJAX, MySQL, D3.js

- Billing, usage, and server status were separate. The reports now sit on one screen.
- D3.js shows those numbers, loaded by AJAX without a full page reload.
- The reports serve 5,000+ active users.

Order, Payment, and Invoice
Stripe, Razorpay, MasterGST, PHP, MySQL

- A paid order used to wait for someone to turn the service on and retype the invoice.
- The payment updates the billing record and turns the service on. The invoice is created from that same order.
- GSTIN and invoice fields are checked before filing. Filing errors on this flow went to zero.

Reseller Cost Tracking
PHP, JavaScript, AJAX, MySQL

- Credits, the monthly plan, and usage were not one account, so sales and cost were hard to see together.
- The reseller account shows profit, usage, and clients, with separate admin and reseller logins.
- The purchase starts the VM. Setup fell from 40 minutes to 5 minutes.

Release Timeline
GitHub Actions, Docker, Kubernetes, Linux

- A customer app reached a live URL only after a manual upload.
- A GitHub repo or ZIP is the release, with a pass or fail status, TLS, and DNS.
- Release time dropped 5x and deployment issues dropped 90%. A failed image scan never goes live.

Education

Bachelor of Computer Applications (BCA) 2019 - 2022
Mohamed Sathak College of Arts and Science, Chennai

Diploma in Counseling Psychology (Online) 2020 - 2021
Sypa IIE

Certifications

- Full Stack Development - Offline Training
- Back-end Development - Meta
- JavaScript - Udemy
- Fundamentals of Cybersecurity - upGrad
- UX Design Process: Empathize, Define, and Ideate - Google

Awards

- Best Performer Award during the Aspire Systems internship for technical contribution and reliability.
- Led a 10-member team during NCC Camp, with responsibility for coordination and accountability.
