RAZEEN H

AI & Full-Stack Engineer (GenAI, RAG, LLM Systems)

razeen.official23@gmail.com | **India :** +91 9345035514

Linkedin | Portfolio | Github

PROFESSIONAL SUMMARY

AI & Full-Stack Engineer with 2+ years of experience building scalable web applications and **AI-powered systems using Generative AI, Retrieval-Augmented Generation (RAG), and Large Language Models (LLMs)**. Experienced in designing **AI assistants, automation pipelines, and knowledge-driven support systems** using Python, FastAPI, LangChain, and vector search technologies such as FAISS.

Strong background in **React, Node.js, and SaaS platform development**, with hands-on experience integrating AI services with production systems, databases, and APIs to automate workflows and enhance user support.

WORK EXPERIENCE

AI & Full Stack Engineer - Hostzop Cloud Technologies Pvt. Ltd. Aug 2023 – present I Chennai

- Designed and developed **AI-powered support automation systems** to assist customers with infrastructure, hosting, and troubleshooting queries.
- Built a **Generative AI Support Assistant using Retrieval-Augmented Generation (RAG)** to retrieve answers from internal documentation and structured databases.
- Implemented **LLM-based conversational workflows** that provide context-aware responses and automate first-level technical support.
- Developed **FastAPI-based AI services** for query processing, knowledge retrieval, and AI inference pipelines.
- Implemented **vector search and embedding pipelines using FAISS and LangChain** to enable semantic knowledge retrieval.
- Integrated AI workflows with support systems to **automatically escalate unresolved issues into support tickets**.
- Built backend services using **Python, FastAPI, and MySQL** to support AI inference and application workflows.
- Developed scalable SaaS dashboards and APIs using **React.js, Node.js, and Express.js** for hosting and cloud service management.
- Automated infrastructure provisioning workflows, reducing **VM/VPS deployment time from 40 minutes to under 5 minutes**.
- Implemented CI/CD pipelines using **GitHub Actions** and deployed applications on Linux servers ensuring reliability and uptime.

Full Stack Developer Intern – Aspire Systems Apr 2023 – Jul 2023

- Engineered a real-time Face Recognition Attendance System using Python and computer vision libraries (OpenCV/CVzone, NumPy), achieving automated user identification.
- Developed and serialized a custom ML model using Pickle for efficient facial feature matching and user authentication.
- Designed and implemented a data pipeline to push recognized user data to Firebase, enabling instant updates and seamless integration with the user interface.
- Applied rigorous testing and debugging, reducing system errors by 40% and increasing overall reliability by 25%

EDUCATION

Mohamed Sathak College of Arts and Science -- Bachelor of Computer Applications (BCA) – (2019 - 2022)

Sypa IIE -- Diploma in Counseling Psychology (Online Course) (2020 - 2021)

CERTIFICATIONS

JavaScript Course – Udemy
Full Stack Development – Offline Training
Fundamentals of Cybersecurity – upGrad
UX Design Process in Empathize , Define and Ideate – Google
Back-end Development – Meta

AWARDS & ACHIEVEMENTS

- Best Performer Award during internship at Aspire Systems for technical contribution and reliability.
- Led a 10-member team during NCC Camp, demonstrating leadership, coordination, and accountability.

SKILLS

AI / Generative AI : Generative AI, Large Language Models (LLM), Retrieval-Augmented Generation (RAG), AI Chatbots, AI Assistants, Prompt Engineering, Semantic Search, Vector Search, Embeddings, LangChain, FAISS, Pinecone, Ollama, Google Gemini API

Frontend : React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, D3.js, Vite, Fetch API, TypeScript

Backend : Node.js, Express.js, PHP, Python, FastAPI, RESTful APIs, Authentication & Authorization

Databases : MySQL, MongoDB, Firebase, Vector Databases (FAISS, Pinecone)

AI Development : LangChain Pipelines, RAG Architecture, Embedding Pipelines, AI API Development, Context-Aware AI Systems, AI Automation Workflows

Integrations : Stripe, Razorpay, MasterGST, Third-Party APIs, Slack Webhooks, AI Model APIs

DevOps & Tools : Git, GitHub, CI/CD (GitHub Actions), Linux, Cron Jobs, Nginx, Apache, cPanel, Plesk

Performance & State : React Hooks, Context API, Custom Hooks, Code Splitting, Lazy Loading, Framer Motion

PROJECTS

Generative AI Support Assistant (RAG + LLM)

Python, FastAPI, LangChain, FAISS

- Built a Generative AI technical support assistant capable of answering infrastructure and hosting queries using internal knowledge bases.
- Implemented Retrieval-Augmented Generation (RAG) pipelines using LangChain and vector similarity search to retrieve relevant context before generating responses.
- Developed FastAPI-based AI inference services to process user queries and deliver context-aware answers.
- Integrated AI workflows with support systems to automatically escalate unresolved issues into support tickets.
- Deployed the AI system on a Linux production server with Plesk, enabling real-time access to the AI assistant in a live environment.

AI Financial Document Analyzer (LLM + Document Retrieval)

Python, Streamlit, Vector Search

- Built an AI application that analyzes earnings call transcripts and financial documents using LLM-powered analysis.
- Implemented document ingestion pipelines and vector search retrieval for semantic document querying.
- Enabled users to query large documents and generate summaries and insights using LLM-based responses.
- Designed a user interface using Streamlit for interactive document analysis and Q&A.

Hostzop SaaS Ecosystem (Client & Reseller Platforms)

- Architected and built the frontend and backend for white-labeled SaaS platforms used by 1,000+ users.
- Developed interactive dashboards using D3.js to visualize billing, usage, and server metrics.
- Implemented scalable state management using React Context API and custom hooks.
- Optimized application performance using memoization (useMemo, useCallback), achieving a 35% improvement in key workflows.
- Enabled white-label support with custom domains and branding.

Reseller Cloud Management Platform

- Built a full-stack reseller system allowing users to purchase, manage, and resell VM infrastructure.
- Implemented credit-based billing, monthly recurring subscriptions, and usage tracking.
- Developed admin and reseller dashboards for monitoring profits, usage, and client activity.
- Integrated secure authentication and role-based access control.

CI/CD & Deployment Automation

- Designed GitHub Actions pipelines for automated build and deployment workflows.
- Implemented SSH-based deployments to production servers, eliminating manual FTP usage.
- Reduced release cycles by 5× and deployment-related issues by 90%.

AI Email Sender (LLM-Powered Outreach Automation)

Python, Ollama (LLM), SMTP, SQLite, Pandas

- Built an AI-powered email automation system that generates personalized job application emails using a local LLM (Ollama).
- Developed a pipeline that reads job leads from Excel spreadsheets and automatically generates role-specific email content using prompt-based LLM generation.
- Implemented automated email delivery using SMTP with rate limiting to avoid spam and provider throttling.
- Designed a logging and deduplication system using SQLite to track sent emails and prevent duplicate outreach.
- Implemented region-aware resume routing (India / UAE) and role-based resume selection using keyword matching.

LANGUAGES

- English (Fluent),
- Tamil (Native),
- Hindi
