PROFESSIONAL SUMMARY

Front-End Developer with 2+ years of experience building responsive, high-performance web applications using React.js, JavaScript (ES6+), HTML5, and CSS3. Strong expertise in component-based UI development, state management, performance optimization, and API-driven interfaces. Experienced in delivering production dashboards and customer-facing applications used by 1,000+ users in SaaS environments.

WORK EXPERIENCE

Full Stack Developer - Hostzop Cloud Technologies Pvt. Ltd. Aug 2023 – present I Chennai

- Developed scalable and maintainable frontend applications using React.js for SaaS client and reseller dashboards.
- Built responsive, mobile-first UI using Tailwind CSS, Flexbox, and CSS Grid.
- Implemented state management using React Hooks, Context API, and reusable custom hooks.
- Created interactive data visualizations using D3.js to display billing, usage, and server metrics.
- Optimized rendering performance using memoization and component reusability, improving UI responsiveness by 35%.
- Integrated frontend components with RESTful APIs for authentication, billing, and automation workflows.
- Ensured cross-browser compatibility and consistent UI behavior across devices.
- Collaborated with backend, QA, and product teams to deliver production-ready features.

Full Stack Developer Intern – Aspire Systems Apr 2023 – Jul 2023

- Engineered a real-time Face Recognition Attendance System using Python and computer vision libraries (OpenCV/cvzone, NumPy), achieving automated user identification.
- Developed and serialized a custom ML model using Pickle for efficient facial feature matching and user authentication.
- Designed and implemented a data pipeline to push recognized user data to Firebase, enabling instant updates and seamless integration with the user interface.
- Applied rigorous testing and debugging, reducing system errors by 40% and increasing overall reliability by 25%

EDUCATION

Mohamed Sathak College of Arts and Science – Chennai
Bachelor of Computer Applications (BCA) - (2019 - 2022)
Sypa IIE
Diploma in Counseling Psychology (Online Course) – (2020 - 2021)

CERTIFICATIONS

JavaScript Course – Udemy

Full Stack Development – Offline Training

Fundamentals of Cybersecurity – upGrad

UX Design Process in Empathize , Define and Ideate – Google

Back-end Development – Meta

AWARDS & ACHIEVEMENTS

- Best Performer Award during internship at Aspire Systems for technical contribution and reliability.
- Led a 10-member team during NCC Camp, demonstrating leadership, coordination, and accountability.

SKILLS ----------

Frontend Core: HTML5, CSS3, JavaScript (ES6+), Responsive Design, Cross-Browser Compatibility, Accessibility Basics

React Ecosystem: React.js, React Hooks, Context API, Custom Hooks, React Router, Vite

Styling & UI: Tailwind CSS, CSS Grid, Flexbox, Emotion, Mobile-First Design

Data & Visualization: D3.js, REST API Integration, Axios, Fetch API

Performance Optimization: Code Splitting, Lazy Loading, Memoization (useMemo, useCallback), Component Optimization

Tools: Git, GitHub, CI/CD Exposure, Chrome DevTools, Linux (Deployment Awareness)

PROJECTS ----------

Hostzop SaaS Dashboards (React.js, D3.js, Tailwind CSS**)**

- Designed and developed white-labeled SaaS dashboards used by 1,000+ active users.
- Built reusable React components to visualize complex billing, usage, and server data using D3.js.
- Translated raw API responses into clear, actionable UI insights with charts, tables, and status indicators.
- Focused on performance, usability, and scalable component architecture for long-term maintainability.

Spotcard – Digital Invitation Platform (Vite, React.js, Emotion**)**

- Developed a mobile-first, highly interactive frontend for digital event invitations.
- Implemented user-facing features including Google Maps routes, event schedules, calendar integration, and media galleries.
- Ensured smooth performance across devices through optimized rendering and responsive layouts.
- Delivered a modern UI experience tailored for both personal and business event use cases.

Muthayammal NEET Academy Website (React.js, Tailwind CSS**)**

- Developed a responsive educational website for a NEET coaching academy using React.js.
- Structured and presented academic content including courses, faculty details, facilities, and student highlights.
- Implemented a clean, accessible UI with Tailwind CSS, optimized for mobile and tablet users.
- Focused on clarity, readability, and performance for student and parent audiences.

Grandstand Event Website (Vite, React.js, Modern CSS**)**

- Built a high-performance marketing website using Vite for fast builds and optimized bundles.
- Engineered fully responsive layouts using CSS Grid and Flexbox.
- Achieved excellent PageSpeed Insights scores through asset optimization and efficient component loading.
- Delivered a consistent brand experience across desktop and mobile devices.

Corporate Websites (Multiple Clients) (HTML5, CSS3, JavaScript**)**

- Developed clean, responsive corporate websites using semantic HTML and modern CSS.
- Enhanced user experience with lightweight JavaScript interactions and dynamic content handling.
- Ensured cross-browser compatibility and long-term maintainability across projects.

Frontend Automation & UX Enhancements

- Integrated real-time alert and notification flows using Slack Webhooks in frontend applications.
- Collaborated with backend systems to reflect live status updates and automation results in the UI.
- Improved overall UX by refining loading states, error handling, and form validations.

CI/CD & Deployment Automation

- Designed GitHub Actions pipelines for automated build and deployment workflows.
- Implemented SSH-based deployments to production servers, eliminating manual FTP usage.
- Reduced release cycles by 5× and deployment-related issues by 90%.
